

THREADING AND RELEASING A RATCHET

THREADING A RATCHET

1. Open Ratchet Handle approximately 90°.
2. Split Axle should be oriented as shown to allow webbing to be fed through.
3. Feed webbing through ratchet axle (from front of ratchet).
4. Pull webbing back over the top of the axle.
5. Fasten hooks to the tie down points on truck or trailer (image not shown).
6. Pull webbing taut (image not shown).
7. Pump ratchet until cargo is secure.
8. Tie off excess webbing and ensure cargo is secure.
