Be Smart when Strapping

Retractable Ratchet Tie-Downs

SmartStraps® patented Retractable Ratchet Tie-Downs are the quickest and easiest tie-downs on the market. The professional-grade Retractable Ratchets can be installed in less than 15 seconds per tie-down, and require no feeding straps in, no tying off ends or removing webbing from the ratchet. The built-in power spring automatically retracts the webbing, making for easy storage, and the handles are ergonomically designed for optimal performance. MSRP is \$29.99 for package of four-6' tie-downs (capacity: 1500 lbs); \$26.99 for package of two-10' tie-downs (capacity: 3000 pounds).

Ratchet X Tie-Downs

The Ratchet X Tie-Downs are made of lightweight aluminum designed to withstand the toughest outdoor conditions. These professional-grade products feature an ergonomic, flared handle which allows for maximum leverage, and sewn-in, "soft-tie" loop which secure cargo without scratching or damaging paint or chrome. Available in packages of 1-4 and lengths of 10' and 14', the Ratchet X Tie-Downs can handle safe workloads of between 500-1000 pounds. MSRP ranges based on package quantity and size. Visit www.smartstraps.com to locate a nearby SmartStraps dealer or to obtain additional information on the full line of SmartStraps products.
